

Hands-on Principal Architect · 19+ yrs · Java + Spring Boot · Multi-tenant SaaS + AI-powered systems · Neptune + GNN · LLM · HIPAA, ISO 27001 · AI-Leveraged Delivery (Claude Code + OpenAI Codex)

SUMMARY

Hands-on principal architect, 19+ years, strongest in Java and Spring Boot — about 11 years across three eras, from server-side Java in 2008 to Spring Boot 2.x on Java 8/17 through February 2025. Decomposed a monolith into 10–15 microservices, consolidated per-customer deployments onto shared multi-tenant software as a service (SaaS) infrastructure with dedicated isolation for regulated banking customers, and moved every instance onto central single sign-on (SSO) with zero user disruption. Then shipped a high-concurrency Go chat platform on Amazon Web Services (AWS) — two-stream Amazon Kinesis, multi-availability-zone failover and disaster recovery, Kubernetes and Terraform adopted company-wide — alongside ten analytics and artificial intelligence (AI) services for a chronic-care platform. Cut infrastructure cost 25–30% and deploy time from hours to under 10 minutes.

Voltuswave Technologies India Pvt Ltd

Hyderabad

- Architected a two-stream Amazon Kinesis design with Enhanced Fan-Out, expanding 4 to 1,200 shards to absorb traffic spikes on a chat platform
- Scaled a Go chat service to 100,000 concurrent connections in burst testing at P95 under 16 ms, on a flow firing ~50 calls per message
- Fortified the chat platform for a certification requirement with multi-availability-zone deployment, failover and disaster recovery across the Go service and two Amazon Kinesis streams
- Reimagined the data layer across DynamoDB, PostgreSQL and OpenSearch with partition-key and indexing design holding P95 under 30 ms at 100,000-user load

- Deployed Datadog observability across production services, cutting the error rate to under 3% and making reliability measurable for the first time - Provisioned production compute on ECS Fargate at 70% Spot, making Kubernetes and Terraform the company-wide standard — deploys under 10 minutes, infrastructure cost down 25–30% - Brokered adoption of Go and DynamoDB across 5 sub-teams, setting cross-organisational technical strategy backed by design-doc discipline
