

Hands-on Principal Software Architect · 19+ yrs · Java + Spring Boot Microservices · Multi-tenant Cloud-Native SaaS · Distributed Systems + Event Streaming · Kubernetes + Docker · Neptune + GNN · HIPAA, ISO 27001

SUMMARY

Hands-on principal architect, 19+ years, strongest in Java and Spring Boot — about 11 years across three eras, from server-side Java in 2008 to Spring Boot 2.x on Java 8/17 through February 2025. Decomposed a monolith into 10–15 microservices on independent scaling and database ownership, consolidated per-customer deployments onto shared multi-tenant software as a service (SaaS) infrastructure with dedicated isolation for regulated banking customers, and moved every instance onto central single sign-on (SSO) with zero user disruption. Then moved a chat platform onto a two-stream Amazon Kinesis backbone spanning multiple availability zones, and built ten analytics and artificial intelligence (AI) services for a chronic-care platform on Kubernetes and Terraform over Amazon Web Services (AWS), under a Health Insurance Portability and Accountability Act (HIPAA) control framework. Cut infrastructure cost 25–30% and deploy time from hours to under 10 minutes.

Key Skills

Technology Leadership & Strategy

- Technology Strategy & Technical Roadmaps
- Enterprise Architecture Governance (Written Design Reviews, Company-Wide Standards Adoption)
- Technical Mentoring & Code Review
- Technical Debt versus Speed-to-Market Trade-offs
- Cross-Functional Leadership & Stakeholder Alignment
- Engineering Team Building & Organisational Scaling

Engineering Excellence

- Java + Spring Boot Microservices (Java 8/17, Spring Boot 2.x — 11 years across three eras)
- Service Boundary Design (Independent Scaling, Database-per-Service, Monolith Decomposition)
- Multi-Tenant SaaS Architecture (Shared-Schema, Per-Tenant Isolation, Regulated Carve-Outs)
- Distributed Systems at Scale (Event Streaming on Amazon Kinesis, Enhanced Fan-Out)
- Relational + NoSQL Data Modelling (PostgreSQL, Amazon Aurora, DynamoDB Single-Table, OpenSearch)
- Distributed Caching (Redis — Canonical Keys, Per-Tenant Namespaces, Single-Flight Locks, 1–6 Hour Time-to-Live)
- Containerisation & Orchestration (Docker, Kubernetes, Terraform, Amazon Elastic Container Service (ECS))
- High Availability & Resilience (Multi-Availability-Zone, Failover, Disaster Recovery)
- Low-Latency Service Design (P95 Latency Budgets, Load Balancing)
- Observability & Reliability Engineering (Datadog, Amplitude, Elasticsearch/Logstash/Kibana (ELK))
- DevOps & Continuous Integration / Continuous Delivery (CI/CD) Transformation
- Identity & Access (Keycloak to Red Hat SSO, OpenID Connect, OAuth 2.0)
- Shared Platform Application Programming Interfaces (APIs) (Contracts, Versioning)
- Event Sourcing + Command Query Responsibility Segregation (CQRS) + Snapshot Exporters
- AI/ML in Product (graph neural network (GNN) on Amazon Neptune, large language model (LLM) clinical workflows, vector retrieval)
- Hands-on AI-Leveraged Delivery (Claude Code + OpenAI Codex, under review)

Business & Delivery

- Agile / Scrum Delivery Management
- Security, Compliance & Data Privacy (HIPAA Pipelines in an ISO 27001-Certified Environment, Least-Privilege)
- Healthcare & Regulated-Industry Delivery (Chronic Care, Protected Health Information, Banking Carve-Outs)
- Performance Optimization & Cost Management
- Enterprise Onboarding & Consolidation at Multi-Hundred-Instance Scale
- Distributed United States–India Delivery Teams

PROFESSIONAL EXPERIENCE

Principal Software Architect	Mar '25 - Apr '26
Voltuswave Technologies India Pvt Ltd	Hyderabad

- Architected a two-stream Amazon Kinesis design with Enhanced Fan-Out, expanding 4 to 1,200 shards to absorb traffic spikes on a chat platform
- Reimagined the data layer across DynamoDB, PostgreSQL and OpenSearch with partition-key and indexing design holding P95 under 30 ms at 100,000-user load
- Fortified the Go chat service and its two Amazon Kinesis streams across multiple availability zones with failover and disaster recovery, driven by HIPAA certification
- Provisioned Amazon Web Services on Kubernetes, Terraform and Docker with ECS Fargate at 70% Spot — deploys under 10 minutes, infrastructure cost down 25–30%
- Deployed Datadog observability across production services, cutting the error rate to under 3% and making reliability measurable for the first time
- Formalised a HIPAA control framework across 10 production pipelines — data protection, access governance, audit trails for clinical workflows

Brokered company-wide adoption of Go and DynamoDB across 5 sub-teams, setting cross-organisational technical strategy backed by design-doc discipline	
Lead SDE/Sr. Staff Engineer / Staff Software Engineer	Dec '19 - Feb '25
Deque Software	Hyderabad
- Steered 70–80% of customers onto shared axe Monitor instances on Spring Boot 2.x and Java 8/17, one codebase also serving regulated banks on dedicated databases - Championed decomposition of a monolith into 10–15 services, splitting on independent scaling and database ownership rather than on team boundaries - Forged central authentication in Java and Spring Boot, migrating every instance from Keycloak to Red Hat single sign-on — users, roles, clients, groups, zero disruption - Implemented multi-tenant isolation across approximately 300 enterprise instances, adding an organisation ID to every table and resolving tenant from the JSON Web Token (JWT) - Stewarded a zero-downtime upgrade from PostgreSQL 9.6 to Aurora PostgreSQL 13.x across every axe Auditor instance, cutting backups 3–4 hours daily and deploy errors 40% - Exposed shared platform APIs to 20+ enterprise clients — Jira integration, API versioning, customer-specific frontends on one Spring Boot backend, backward compatibility - Productized a billing and subscription service consumed by every product, porting it from Node.js/TypeScript to Java and Spring Boot and gating feature access by subscription - Modernised CI/CD from Jenkins to GitHub Actions, achieving ISO 27001 and 50% faster release cycles - Slashed regression testing time over 50% with an end-to-end automated testing framework built on Puppeteer - Accelerated time-to-market 2+ weeks per sprint, leading multi-tenant SaaS delivery across engineering, quality assurance (QA) and support	
Software Engineer III	Aug '18 - Jul '19
Rocket Software	Bangalore
- Anchored decomposition of IBM Db2 Configuration Manager into Java and Spring Boot microservices, defining boundaries across z/OS and Linux, UNIX and Windows platforms - Coached a 5-engineer team through delivery planning, code review and performance appraisals while remaining hands-on as an individual contributor - Surfaced defect hot-spots through representational state transfer (REST) interfaces and service isolation, reducing reported bugs over 50% - Partnered with product to extend platform support to Windows and Linux — Ubuntu, CentOS and Red Hat Enterprise Linux (RHEL) — raising sales over 20%	
Co-Founder and VP of Technology	Mar '17 - Apr '18
Voltuswave Technologies India Pvt Ltd	Hyderabad
- Co-founded VoltusWave and launched its first application Platform-as-a-Service (aPaaS) product for web and Android, winning 8 early enterprise clients - Mobilized an engineering organisation from 0 to 35 in 13 months, mentoring freshers and senior engineers while establishing delivery process - Helmed development, deployment and operations on Amazon Elastic Container Service, setting the architecture roadmap every subsequent product inherited	
Senior Software Engineer	Mar '16 - Mar '17
Teletext India Private Limited, Hyderabad	Hyderabad
- Codified a scatter-gather integration across 25 hotel suppliers on a MuleSoft enterprise service bus, succeeding where a prior .NET 2.0 upgrade had failed - Cut operational cost 46% by retiring a third-party pricing product for an in-house ELK cache with a 20-minute time-to-live - Lifted hotel booking conversions 65% by widening matched inventory and ranking contracted properties first across 2–3 million daily requests	
Technical Architect	May '15 - Nov '15
CURA Software Solutions	Hyderabad
- Introduced Linux/Unix deployment for the Governance, Risk & Compliance platform, cutting running costs and winning 12 new customers within 2 months - Ported the data model from Microsoft SQL Server to MySQL, enabling the low-cost Linux deployment	
Technical Lead	Jul '13 - May '15
innRoad India Hotel Software Pvt. Ltd.	Hyderabad
- Converted a legacy ASP.NET 2.0 application into a modern single-page application using Knockout.js and a Boilerplate JavaScript framework - Productized REST-based WCF services that enabled and monetised customer integrations - Codified engineering standards and mentored the team through a full product-modernisation effort	
Software Architect	Jun '12 - May '13
McDonald's Corporation	OakBrook, IL
- Modeled the schema and governance framework for an enterprise Master Data Management (MDM) program - Forged interactive user-interface screens with drill-down, dynamic drop-downs, and full row-level editing - Partnered with data owners to deliver a robust enterprise data-governance system across the organisation	
Senior Java Developer	Apr '08 - May '12
El Paso Corporation	Houston, TX
- Rebuilt a legacy Citrix-hosted Java application into a modern .NET 2.0 stack on SQL Server 2005 - Steered a scalable, maintainable .NET platform that replaced the outdated system while preserving core business functions - Anchored large-scale enterprise modernisation for a high-stakes energy-sector client	
.NET Developer	Apr '07 - Apr '08

- Developed Paymaster, a **PayPal**-style payments application, for a Mexican financial institution

EDUCATION

PG Diploma in Artificial Intelligence and Machine Learning Jan '21

IIIT Bangalore

Master's in Computer Science Aug '04 - Dec '07

University of Houston Houston, Texas

CERTIFICATION

PG Diploma in Artificial Intelligence and Machine Learning, IIIT Bangalore
