

Hands-on Principal Architect · 19+ yrs · Java + Spring Boot · Multi-tenant SaaS + AI-powered systems · Neptune + GNN · LLM · HIPAA, ISO 27001 · AI-Leveraged Delivery (Claude Code + OpenAI Codex)

SUMMARY

Hands-on principal architect, 19+ years, strongest in Java and Spring Boot — about 11 years across three eras, from server-side Java in 2008 to Spring Boot 2.x on Java 8/17 through February 2025. Consolidated per-customer deployments onto shared multi-tenant software as a service (SaaS) infrastructure with dedicated isolation for regulated banking customers, and moved every instance onto central single sign-on (SSO) with zero user disruption. Then shipped ten analytics and artificial intelligence (AI) services for a chronic-care platform on Amazon Web Services (AWS): causal inference and leakage-safe machine learning over 9–10 years of patient history, deterministic code owning every number, and self-hosted models keeping patient data inside the client boundary. Cut infrastructure cost 25–30% and deploy time from hours to under 10 minutes.

Key Skills

Technology Leadership & Strategy

- Technology Strategy & Architecture
- Engineering Team Building & Organisational Scaling
- Product & Platform Strategy
- Decision-Intelligence Platforms (Event-Sourced + Graph + AI)
- Data Platform & Analytics Leadership
- Cross-Functional Leadership & Stakeholder Alignment

Engineering Excellence

- Multi-Tenant SaaS Architecture (Shared-Schema, Per-Tenant Isolation, Regulated Carve-Outs)
- Java + Spring Boot Microservices (Java 8/17, Spring Boot 2.x, JSP — 11 years across three eras)
- System Design at Scale (Distributed Systems + RDBMS + APIs)
- Cross-Team Technical Leadership (6 sub-teams, company-wide standards)
- Hands-on Player-Coach Delivery (AI-Leveraged via Claude Code + OpenAI Codex)
- AI/ML in Product (GNN on Amazon Neptune, LLM clinical workflows, vector retrieval)
- Event Sourcing + Command Query Responsibility Segregation (CQRS) + Snapshot Exporters
- Statistical Rigor in Production AI (Propensity Matching, Inverse Probability Weighting, Standardised Mean Difference Balance Gates, Bootstrap CI, Sensitivity Analysis)
- Leakage-Safe Machine Learning (As-Of Featurisation, Point-in-Time Correctness, Outcome-Maturity Windows)
- LLM Productionisation (Guardrails, Field-Level Claim Grammar, Replay Determinism)
- Self-Hosted Models In-VPC (Ollama, Llama 3.1, SageMaker Embeddings, Self-Hosted LangSmith)
- Vector & Columnar Data Stores (Elasticsearch dense_vector, DuckDB + Parquet, Redis, Amazon Neptune + Gremlin)
- Shared Platform APIs (Contracts, Backward Compatibility)
- Cloud Infrastructure & Platform Engineering (AWS — Kinesis, Lambda, ECS, SageMaker, Aurora, DynamoDB)
- Identity & Access (Keycloak to Red Hat SSO, OpenID Connect, OAuth 2.0, RBAC)
- DevOps & CI/CD Transformation
- Observability & Reliability Engineering (Datadog, Amplitude, ELK)

Business & Delivery

- Agile / Scrum Delivery Management
- Security, Compliance & Data Privacy (HIPAA Pipelines in an ISO 27001-Certified Environment, Least-Privilege)
- Performance Optimization & Cost Management
- Accessibility Compliance (WCAG 2.2 Level AA)
- Enterprise Onboarding & Consolidation at Multi-Hundred-Instance Scale
- Distributed United States–India Delivery Teams

PROFESSIONAL EXPERIENCE

Principal Software Architect Mar '25 - Apr '26

Voltuswave Technologies India Pvt Ltd Hyderabad

- Architected a two-stream Amazon Kinesis design with Enhanced Fan-Out, expanding 4 to 1,200 shards to absorb traffic spikes on a chat platform
- Scaled a Go chat service to 100,000 concurrent connections in burst testing at P95 under 16 ms, on a flow firing ~50 calls per message
- Deployed Datadog observability across production services, cutting the error rate to under 3% and making reliability measurable for the first time
- Delivered patient onboarding off a third-party messaging tool onto the in-house platform, moving 10,000+ patients onto the product as primary channel
- Engineered a retrieval-augmented generation (RAG) pipeline on Elasticsearch dense_vector filtered nearest-neighbour search across 80+ chronic conditions, keeping Amazon Neptune off the serving path

• Drove a measured Claude Code and OpenAI Codex rollout across a 20-engineer team, covering first-cut implementation and test scaffolding under review • Hardened ten production analytics services through structured adversarial self-review, absorbing twenty findings into one design and holding another dark until its upstream contract shipped • Extracted confounder-gated cohort comparisons behind propensity matching and standardised mean difference balance checks, making an unbalanced headline unrepresentable in the output type • Sequenced patient event histories into a relapse early-warning model on Amazon SageMaker, gated never to train on an outcome window that had not matured • Secured protected health information inside the client virtual private cloud by self-hosting embeddings and Llama 3.1 for every model call	Dec '19 - Feb '25
Lead SDE/Sr. Staff Engineer / Staff Software Engineer	
Deque Software	Hyderabad
• Implemented multi-tenant isolation across approximately 300 enterprise instances, adding an organisation ID to every table and resolving tenant from the JSON Web Token (JWT) • Steered 70–80% of customers onto shared instances while regulated banks kept dedicated databases, with one codebase serving both deployment models • Forged a central authentication service in Java and Spring Boot, migrating every instance from Keycloak to Red Hat single sign-on with zero user disruption • Productized a billing and subscription service consumed by every product in the portfolio, porting it from Node.js/TypeScript to Java and Spring Boot • Stewarded a zero-downtime upgrade from PostgreSQL 9.6 to Amazon Aurora PostgreSQL 13.x across every axe Auditor instance • Championed decomposition of a monolith into 10–15 services, splitting on independent scaling and database ownership rather than on team boundaries	
Software Engineer III	Aug '18 - Jul '19
Rocket Software	Bangalore
• Anchored decomposition of IBM Db2 Configuration Manager into Java and Spring Boot microservices, defining boundaries across z/OS and Linux, UNIX and Windows platforms • Coached a 5-engineer team through delivery planning, code review and performance appraisals while remaining hands-on as an individual contributor • Surfaced defect hot-spots through REST interfaces and service isolation, reducing reported bugs over 50% • Partnered with product to extend platform support to Windows and Linux — Ubuntu, CentOS and Red Hat Enterprise Linux (RHEL) — raising sales over 20%	
Co-Founder and VP of Technology	Mar '17 - Apr '18
Voltuswave Technologies India Pvt Ltd	Hyderabad
• Co-founded VoltusWave and launched its first application Platform-as-a-Service (aPaaS) product for web and Android, winning 8 early enterprise clients • Mobilized an engineering organisation from 0 to 35 in 13 months, mentoring freshers and senior engineers while establishing delivery process • Helmed development, deployment and operations on Amazon Elastic Container Service, setting the architecture roadmap every subsequent product inherited	
Senior Software Engineer	Mar '16 - Mar '17
Teletext India Private Limited, Hyderabad	Hyderabad
• Codified a scatter-gather integration across 25 hotel suppliers on a MuleSoft enterprise service bus, succeeding where a prior .NET 2.0 upgrade had failed • Cut operational cost 46% by retiring a third-party pricing product for an in-house ELK cache with a 20-minute time-to-live • Reconciled supplier hotel identifiers onto GIATA MultiCodes, automating the pipeline on AWS Lambda with human approval retained, growing revenue 8% month over month • Lifted hotel booking conversions 65% by widening matched inventory and ranking contracted properties first across 2–3 million daily requests	
Technical Architect	May '15 - Nov '15
CURA Software Solutions	Hyderabad
• Introduced Linux/Unix deployment for the Governance, Risk & Compliance platform, cutting running costs and winning 12 new customers within 2 months • Ported the data model from Microsoft SQL Server to MySQL, enabling the low-cost Linux deployment	
Technical Lead	Jul '13 - May '15
innRoad India Hotel Software Pvt. Ltd.	Hyderabad
• Converted a legacy ASP.NET 2.0 application into a modern single-page application using Knockout.js and a Boilerplate JavaScript framework • Productized REST-based WCF services that enabled and monetised customer integrations • Codified engineering standards and mentored the team through a full product-modernisation effort	
Software Architect	Jun '12 - May '13
McDonald's Corporation	OakBrook, IL
• Modeled the schema and governance framework for an enterprise Master Data Management (MDM) program • Forged interactive user-interface screens with drill-down, dynamic drop-downs, and full row-level editing • Partnered with data owners to deliver a robust enterprise data-governance system across the organisation	
Senior Java Developer	Apr '08 - May '12
El Paso Corporation	Houston, TX
• Rebuilt a legacy Citrix-hosted Java application into a modern .NET 2.0 stack on SQL Server 2005 • Steered a scalable, maintainable .NET platform that replaced the outdated system while preserving core business functions • Anchored large-scale enterprise modernisation for a high-stakes energy-sector client	
.NET Developer	Apr '07 - Apr '08

- Developed Paymaster, a **PayPal**-style payments application, for a Mexican financial institution

EDUCATION

PG Diploma in Artificial Intelligence and Machine Learning Jan '21

IIIT Bangalore

Master's in Computer Science Aug '04 - Dec '07

University of Houston Houston, Texas

CERTIFICATION

PG Diploma in Artificial Intelligence and Machine Learning, IIIT Bangalore
